Garage Floor Tiles by TilePlans

- Heavyduty interlocking workshop floors

Designed especially for busy garages and workshops, TilePlans PVC interlocking garage floor tiles provide the ultimate in garage floor coverings and are an ideal customized flooring system for commercial workshops.

Satisfied customers worldwide have found TilePlans floor tiles to be the best choice by far and have proven to be a great investment value.

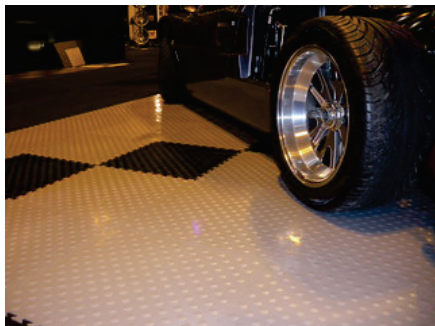

Garage Tile-plan

We offer a full consultancy service to advise you on our flooring range. A national installation service is also available.

Budget Garage Tile-plan

At the budget end of the range but not to be overlooked is the TilePlans 4mm thick garage floor tile. Made from the same industrial spec PVC but in a slimmer mould, the 4mm thick tile has still proven itself in demanding workshop areas. Smooth or Studded options are available in all 10 colours.

Heavy Duty Interlocking Tiles

TilePlans Heavy Duty 7mm thick floor tiles are the originals, the favourites and the best sellers by far. Strong enough to withstand constant use in busy workshops the 7mm system has the most comprehensive range of accessories to customize your garage or workshop floor to the max!

Customize Your Garage Workshop Floor With Lines & Logo

In addition, TilePlans can help you design your floor to comply with Workshop Safety legislation or use your floor to display the logo of your favourite 2 wheel or 4 wheel marque.

TilePlans brightly coloured line marker tiles create demarcation lines to separate areas within your workshop or parking bays within your garage floor.

New innovative Clear or 'See - through' Logo Tiles enable you to place advisory signs or your vehicle's logo under the clear tile, thus incorporating the sign or logo within your floor. Any sign placed underneath are changeable in seconds if needed later.

TilePlans has helped create highly-customized garage floor designs for many customers and incorporated accessories such as TilePlans Water-Jet cut logo tiles and even LED line marking.

Tileplans Offer The Ultimate in Garage Floor Systems

TilePlans interlocking floor tiles are rapidly installed. No adhesive is required.

All TilePlans Garage Floor owners welcome the rapid installation and low maintenance benefits of TilePlans interlocking floor tiles and take pride in the smart and professional appearance of their new garage floor.

Hidden Joint Slate Finish & Dimple Studded options

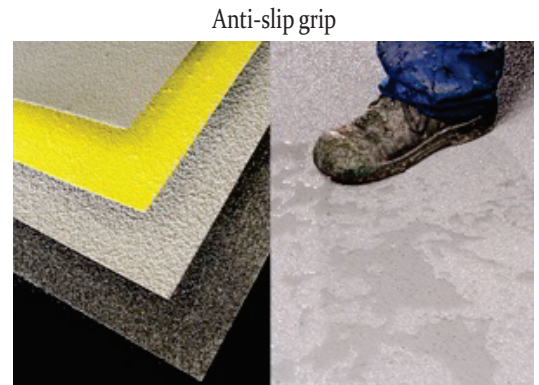

Anti-slip Floor Tiles by Tileplans

- A cost-effective non-slip safety flooring

Tileplans GRP Safety Flooring

TilePlans GRP Safety Flooring products are made with an extremely tough surface finish. This makes for a very safe and Anti-Slip floor covering in areas such as:

- * Walkways
- * Stairways
- * Wet areas

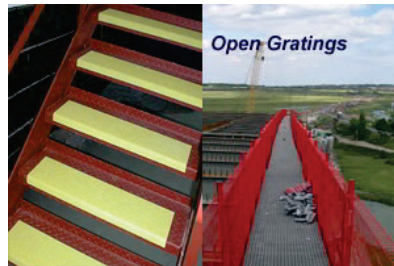

TilePlans GRP Non-slip products come in both flat sheet tiles of various thicknesses or are formed to cover stairway treads or open grating areas.

Anti-Fatigue matting tiles

Proven to reduce slips trips & falls

The Range Is Ideal For Applications Such As

Oily areas where high Slip Resistance is key, for example work areas and Heavy Duty traffic areas where vehicles such as fork lift trucks are moving.

Both internal and external areas can be covered with the products and the GRP material used is resistant to most chemicals.

The standard colours are: Safety-Yellow, Black, and Grey.

Stair-Nosings can be highlighted on the front edge in yellow and Flat Sheets can also feature painted Chevrons to highlight hazards.

Flat sheets can also be chamfered on edges as required to remove any trip hazards

Options

Graphics, Lettering and Logos can be water jet cut into the GRP material (safety signage)

Anti-Fatigue Chequer Plate Floor Tiles

- A cost-effective anti-fatigue flooring

Anti-Fatigue Chequer Plate Matting

Benefits :-

TilePlans Chequer Plate Anti-fatigue Floor Matting has an extremely tough chequer plate surface finish.

This matting finish is also known as Diamond Plate or Tread Plate and makes for very safe, slip-resistant and Anti-fatigue flooring.

This matting delivers where a practical, anti-fatigue surface is sought.

Uniquely, the bevelled edge surface detail allows a continuous pattern to be achieved enhancing the overall effect.

The 12mm thick matting is extremely durable and makes an ideal easy to install floor covering for walkways. Heavy foot traffic will benefit from it's anti-fatigue properties.

Anti-Fatigue Chequer Plate Matting Qualities :-

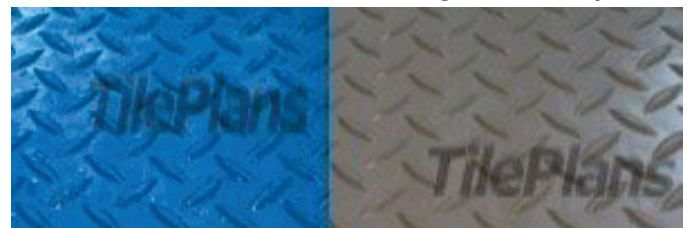

- * Oily areas where high Slip Resistance is key
- * Wet work areas with standing water.
- * Standing areas where anti-fatigue is required by staff.
- * TilePlans Anti-fatigue and Nonslip Floor Matting creates a multi-purpose safety floor designed for industrial or machinery areas where oil and chemicals are present.

Also ideal as a fast set-up floor system for outdoor exhibitions where conditions may be damp and a non-slip covering is required..

Design, Colour & Layout

- * Standard colour is Black
- * Other colour are available on request
- * Metallic colours also available including silver.

Colours are available to order for example Blue and Grey

Accessories

Sloped edging ramps take the Anti-Fatigue mats 12mm thickness down to 1mm thickness and are available to connect on all sides.

TilePlans Anti Fatigue Flooring

Anti Bacteria Floor Tiles by TilePlans

- A cost-effective hygienic flooring surface

Innovative UK based PVC flooring specialist TilePlans offers its AntibacTile to help fight bacteria such as the notorious MRSA.

The latest in antimicrobial floor systems, TilePlans PVC based floor incorporates an antibacterial system which harnesses the natural sterilising properties of Ionic silver claimed to significantly reduce bacterial and fungus growth.

Independent tests have shown that Antibacterial Floor Surfaces manufactured with the antimicrobial PVC compound can reduce bacterial population by more than 99.8%.

The antimicrobial PVC tiles have been tested according to the JIS Z 2801:2000 standard and are effective against GM+ve and GM-ve bacteria.

The anti-microbial technology is EPA (US Environmental Protection Agency) registered and complies with the European Biocidal Products Directive (BPD).

This means that industry and environments such as Sports treatment, hospitals, health centres, food manufacturing – in fact any area where antibacterial floor surfaces, food hygiene and fighting bacteria is a high priority – can use TilePlans' antibacterial system as part of their hygiene and antibacterial strategy.

Quality antibacteria flooring system designed for haevy traffic

The antimicrobial flooring tiles can help reduce the growth of killer illness causing organisms such as MRSA, E. Coli, Pseudomonas Aeruginosa and Salmonella.

While this floor does not remove the need for normal cleaning practices, it will provide increased protection between cleaning cycles and represents an excellent complementary measure.

TilePlans specialist cleaning division can also advise on bespoke cleaning regimes and equipment

Specialist manufacturing

Unlike coatings or coated products, the antimicrobial PVC Ionic silver is uniformly dispersed throughout our PVC hygienic flooring tiles, ensuring the key performance remains unaffected by scratches and surface abrasion.

TilePlans' PVC floor tiles interlock to create a complete floor which can be installed quickly and which is easy to clean and maintain.

The hard-wearing tiles offer a durable flooring solution which is also adaptable. For instance, TilePlans offers a transparent tile which can be used to create health and safety signage on the floor.

Tiles of different colours can be used to separate work areas – You can create demarcation lines with our special line tile product.

TilePlans' hygienic interlocking PVC tiles are available in four, six and a half, seven or seven and a half millimeter thicknesses in a range of colours. Bespoke colours are available by special order. Various styles of tile finish include Raised Disc Coin Studded, Dimple Studded, Leather-Grained and Slate varieties.

- * Wide choice of connections
- * 1M Ω resistor

Straight cords

Product specifications : Material : Each cord contains 10 special conductive wires, outer covered with a conductive polyurethane(PU).

Diameter: 2.4mm

Colour: Black

Resistance: 1M- Ω

Options: Other lengths, connections and colours available on request

Heel grounder straps

Slip resistant heel grounder, designed with a fast-fastening buckle and a ribbon for insertion in the shoe.

- Heel grounders are to be worn on an ESD-floor.
- Recommended to be worn on each foot.
- Heel grounders are re-usable and hand-washable.

Properties : Double layer conductive rubber cup : – outer surface : Conductive, Black, surface resistance $\leq 10e5 \Omega$ – inner surface : Antistatic, Each grounder is built in with a 1.5 M Ω resistor.

Tileplans Interlocking PVC Entrance Matting

- The cost-effective barrier and scraper matting system

The Matador Barrier Matting system operates as a first line of defence to prevent dirt entering a building.

A 'MATADOR' mat at each entrance goes a long way towards achieving this.

It works without the conscious co-operation of the visitor – the corrugated rubber flicks debris from the shoes.

The dirt removed then falls beneath the mat where it remains trapped until taken up by a vacuum cleaner.

Matador matting lasts for MANY years in both internal and external applications.

The mats are tough but remain light and easily handled for removal of trapped dirt and grit by a vacuum cleaner.

Because of the small surface area, dirt will not then be picked up on clean shoes and carried into the building.

If placed outside, the matador may be fixed down to secure. Matador is reversible – doubling the life and wear capacity.

The Matador is more efficient and hygienic than fibre or rubber link mats, because dirt is not held in the mat itself.

The success of this mat has been proven by many years of industrial use, also protecting your floor coverings, escalators and lift mechanisms.

The success of this mat has been proven by many years of industrial use, also protecting your floor coverings, escalators and lift mechanisms.

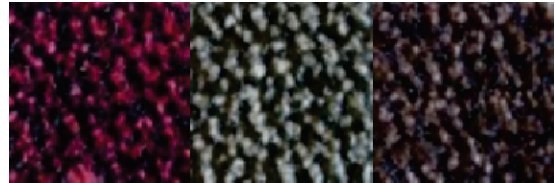

TilePlans Modular Matting Tile System

Modular Matting offers an easy, clean and flexible system for every entrance area. With minimum install down-time, the clean-off zone can be overlaid with modules designed to blend perfectly with their surroundings.

Inserts available :

- Carpet – Red, Grey or Brown
- Rubber – Tough, durable and designed to grab dirt and debris

Carpet Insert Colours: Red, Grey or Brown

Enabling temporary or Long term use the purpose fitting matting can then be added in no time at all.

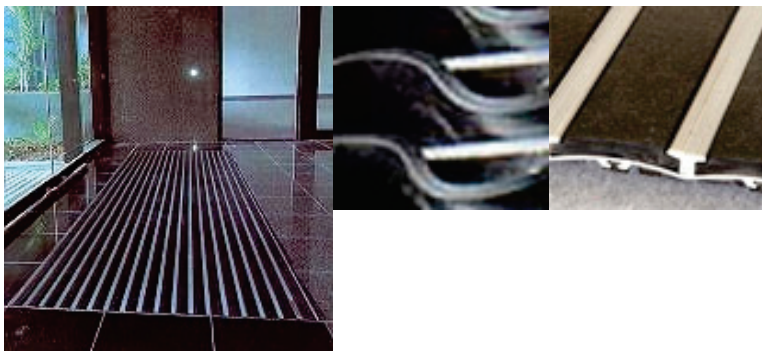

TilePlans Matador – the first line of defence for all businesses

Tactile Paving - The Effective Ground Surface Indicators for DDA Compliance

TilePlans have pioneered a new Peel and Bond ground surface indicator tile, with outstanding and far-reaching benefits:

- * Can be walked on immediately
- * Minimal disruption to traffic
- * Fast and no mess installation over large areas

Peel and Bond installation means our tactile pavers can be fitted onto surfaces that would normally be difficult to do so such as concrete, bitumen, timber, tiles, carpet and ceramic.

TilePlans Tactiles are supplied with either raised domes, studs or stripes which can be placed in patterns on the ground to provide tactile paving

They aim to help your environment achieve compliance with the Disability Discrimination Act (DDA).

- * Performs in extreme temperatures.
- * Proven over 5 years in extreme conditions
- * Unique strong bonding to concrete
- * Health and safety benefits
- * No epoxy glues
- * Long life leads to huge spending reductions

TilePlans Peel and Stick Tactile Paving – Studded finish

Our Tactiles are made from high quality polyurethane. Strong, durable and conceived with extreme conditions in mind, the polyurethane gives the tactile tiles a lasting edge and superior performance.

YMESSB

They have been developed for today's demands and tomorrow's conditions. The technological advancement of the tiles places them ahead of their time, and their versatility and innovation pays a subtle compliment to revolutionary design and leading construction".

Tactile finish options - Stripe, Studded or Plain

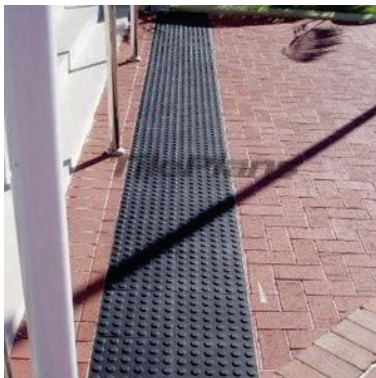

TilePlans Tactiles will install onto glass, carpet, parquetry, vitrified, porcelain, vinyl, masonry in fact virtually all substrates.

TilePlans Tactile Colours - bespoke colours available

Tactile Indicators are available in 4 standard colours and can be matched to suit any colour provided that they meet with a 30% Luminance contrast. Also available are fire retardant tactiles suitable for all fire escapes and exits.

Tactile Paving installed in Black

Tactile Paving installed in Yellow
